

- **Protect patient safety**
- **Facilitate regulatory compliance**
- **Reduce risk of sanctions, fines and loss of accreditation**

## Why conduct ongoing sanctions, actions and exclusions monitoring?

Healthcare organizations that participate in Medicare and Medicaid programs must maintain compliance with a vast number of laws and regulations designed to protect patients and to combat fraud. Organizations involved in federal and state funded programs cannot employ any party that appears on specific sanctions lists.

Sanctions monitoring helps healthcare organizations maintain compliance by identifying, on an ongoing basis, employees who have been sanctioned or excluded from participating in these programs and reduces the risk of associated fines, sanctions and other adverse actions.

## HireRight's Healthcare Sanctions and Actions Monitoring

Healthcare Sanctions and Actions Monitoring is a comprehensive, roster based daily scan that identifies individuals with adverse information who can pose a safety risk to patients and a financial and reputational risk to organizations.

Monitoring is available in three search levels – (Federal, State Med and All). HireRight perfects results beyond just the name match, returning only results that match the candidate with at least two matching identifiers and are confirmed with primary source documentation. Previously reported results are filtered out to minimize the volume of data to review.

# Healthcare Sanctions and Actions Monitoring

---

## How it works

The client provides and maintains a roster of active employees. Rosters can be uploaded and maintained via the UI, batch upload or through integrating directly with HireRight or a HireRight partner integration. By setting a hire adjudication status, individuals that meet pre-employment screening requirements can be added to the monitoring program automatically. Monitoring continues on an employee until that individual is removed from the roster by the client.

A monitoring dashboard provides program management and access to program status. Management reports provide audit support for the program.

## Getting Started
